

PhD position: CR UK funded PhD studentship

The London School of Hygiene and Tropical Medicine invite applications for a 4-year Cancer Research UK-funded PhD studentship, as part of a Cancer Research UK five-year programme on Inequalities in Cancer Outcomes, led by Pr Bernard Rachet. The aims of the PhD are (i) to conduct methodological development in the field of causal inference using observational time-to-event data, and then (ii) apply these methods on real data to investigate inequalities in cancer care and survival.

It is anticipated that the position will start in September 2020 or shortly thereafter, depending on the current global situation.

Informal enquiries can be made to Pr Bernard Rachet (bernard.rachet@lshtm.ac.uk) and Dr Aurélien Belot (aurelien.belot@lshtm.ac.uk).
