

JUNIOR RESEARCH SCIENTIST - STATISTICS

You have just defended your PhD in applied statistics/ biostatistics or you are finishing a post-doctoral position and would like a first experience outside of academia. Joining Modus Outcomes's growing Statistics team will give you the opportunity to continue doing cutting-edge research in a stimulating working environment and make a real difference.

Modus Outcomes

Modus Outcomes brings the patient voice to clinical research. Our work, grounded in the patient experience, allows us to design meaningful outcome measures to optimize decision-making about the development, commercialization, and use of medical products. We aspire to ensure fairness in high-stakes decisions by advancing the accuracy and interpretability of measurements.

Modus Outcomes is a patient-centered outcomes consultancy created in 2014 with offices in the US (Cambridge), UK (Letchworth Garden City, near London) and France (Lyon). Our global team is composed of about 25 highly skilled scientists (MS/MSc or PhD) in various field of expertise (clinical, psychology, psychometrics, statistics). We believe in innovation and encourage academic excellence in our daily work, as illustrated by the publication list of the team (<https://modusoutcomes.com/resources/publications/>) and the academic activities of many of the team members (teaching, student supervision, training, collaboration with international academic teams).

Our France-based team is our expert center for statistics applied to patient-centered outcomes measures. It includes 5 biostatisticians (two with more than 15 years of experience).

Our offer

We are searching for a Junior Research Scientist to join our Statistics team based in Lyon (France). They will contribute to international patient-centered outcomes research projects including:

- Research design and implementation, with support of the senior team: Design and programming of psychometrics and statistical analyses of patient-centered outcomes data from clinical or observational studies
- Preparation of documents related to the psychometrics and statistical aspects of projects (statistical parts of protocols, statistical analysis plans, slide decks, reports, scientific communications) under supervision of the senior team

- Development of areas of expertise in the analysis of patient-centered outcomes data and contribution to the visibility of Modus Outcomes in the scientific community

The position is open in our Lyon office.

Your profile

You have a PhD in Biostatistics, or Applied Mathematics, and would like to apply your skills to real world questions. You are curious to discover a new field of research and new methods, including qualitative and mixed methods research. Ideally, you know how to program with SAS or ready to learn. You are passionate and take pride of the quality of the work you deliver. You speak English fluently. Speaking French would be a plus.

How to apply?

You can send your application by email to

Juliette Meunier, Associate Director – Statistics, French team lead, Modus Outcomes
